

EEMA Announces Membership of the European Cyber Security Organisation

BRUSSELS, 28th AUGUST 2017 - [EEMA](#), the leading independent not for profit, European think tank focussing on identification, authentication, privacy, risk management, cyber security, the Internet of Things and mobile applications, has joined the European Cyber Security Organisation (ECSO).

ECSO is a fully self-financed non-for-profit organisation under the Belgian law, established in June 2016. It represents the industry-led contractual counterpart to the European Commission for the implementation of the Cyber Security contractual Public-Private Partnership (cPPP). Members include a wide variety of stakeholders such as large companies, SMEs and Start-ups, research centres, universities, end-users, operators, clusters and association as well as European Member State's local, regional and national administrations, countries part of the European Economic Area (EEA) and the European Free Trade Association (EFTA) and H2020 associated countries.

Chair of EEMA, Jon Shamah, states: "For more than 30 years, EEMA has been bringing together public and private organisations, governments and academics, throughout the EU and wider Europe, to address the ever-evolving challenges relating to cyber security. Our membership of ECSO represents a new and important opportunity to further support, inform and educate our members."

In November, EEMA will be hosting its 19th annual ISSE (Information Security Solutions Europe) conference and exhibition with Deloitte in Belgium. The title for 2017 is 'The Future of Digital Security & Trust'. The event will include a cutting-edge educational programme of more than 40 presentations and seminars including an ECSO workshop. ISSE 2017 will address the latest developments in information security, with a special emphasis on European directions and regulations. It takes place on 14th and 15th November.

For more information about ISSE 2017 and to register visit: www.isse.eu.com.

FINAL

Brussels-based [EEMA](#), is the leading independent European think tank focussing on identification, authentication, privacy, risk management, cyber security, the Internet of Things and mobile applications. EEMA's world class conferences provide the forum to network with digital enterprise experts, high level EC and other government experts. Meanwhile, its series of high level fireside briefings in Brussels and London provide the ideal forum for industry leaders to tackle controversial hot topics in an intimate, invitation only setting.

Through collaboration with EU & Global Partners (including the creation and coordination of the European Trust Foundation), EEMA has an established and growing network throughout Europe. This community provides the ideal platform to disseminate information and share expertise regarding the high-profile and significant EU projects EEMA is involved in.
