Validation Workflow

• ValS signature result;
• Response from the Issuer bundle;
• Response from ODSP (if applicable).
• The final result is only considered as VALID in case if there are no “INVALID” or “INDETERMINATE” responses.
• There is no e-Apostile issued in Georgia yet.
• Sample documents with e-Apostilles were collected during various meetings and workshops.
• New types of e-Apostilles can be easily added to the pilot application.
Preparation for Georgian e-Apostille
