Integrating ECAS with STORK

Frédéric Poels
HELLO-WORLD
why are we here?
STORK is a project that delivers an interface for authenticating users by means of their national eID
ECAS is a project that delivers an interface for authenticating users accessing European Commission applications
ECAS-STORK is a project that delivers an interface for authenticating users accessing European Commission applications by means of their national eID.
why?
We eat our own dog food
eID has a chicken and egg problem
eID gives the opportunity to evolve
eID is cool
FREE
how?
Thou shalt not collect credentials
Control
Change
Partial coverage is like zero coverage
what's next?
SAML v2.0
Security Assertion Markup Language
Interoperability works!
What we do outside
we can do inside
Connector
