A big thank you to everyone who contributed to make EEMA’s 35th Annual Conference such a resounding success. Representatives from 19 countries joined EEMA at Microsoft’s head-office in London for two days of discussion and lively debate on the topic of securing identity and its business models.

The introduction of digital wallets was one of the key topics of debate, and it was refreshing to hear so much emphasis being placed how to make them accessible and beneficial for all, the commercial opportunity of identity (whether centralised, federated, or decentralised), alongside issues of policy (notably the forthcoming updates to eIDAS regulation) and the many technological advances being made.

The many important discussions that begun in London will continue in future EEMA events including High-Level Fireside Briefing and the ISSE conference in Brussels, later this year . So, if you are not a member already, visit www.eema.org and join us to collaborate, influence and impact the stakeholders, working at the highest level to transform the digital environment for citizens, organisations and governments throughout Europe.

Lorraine Spector,
EEMA Board of
Management

Hans Graux receives 2022 Kim Cameron Lifetime Achievement Award

Hans is an ICT Lawyer at Timelex, a trusted project partner for EEMA, collaborating on European Union Horizon 2020 research and innovation projects STORK 2.0, LIGHTest and FutureTrust, as well as current initiatives - LOCARD and DE4A.

Hans has contributed to European Commission work on data protection, eSignatures, eID, cloud computing, e-government and information security. He is a member of the ICT Committee of the Council of Bars and Law Societies of Europe, as well as a Member of the ICT Committee of the Order of Flemish Bar, and the president of the Flemish regional data protection authority.
