ISSE 2020 Focuses on Solving the Digital On-Boarding Challenge and How to Build a Single Identity System for Europe

Six Webinar Series Takes Place 17th- 19th November 2020

BRUSSELS, 21st OCTOBER 2020 - EEMA the leading independent European Think Tank focused on identity, privacy and trust, has announced the programme for its 22nd annual ISSE conference ‘Vision for European Security and Trust’, which takes place virtually from 17th – 19th November. Registration is open now for six free webinars, with world-class speakers and fascinating topics, sponsored by Microsoft, Cloud Signature Consortium, Infocert and Signicat.

Chair of EEMA, Jon Shamah states: “This year we have seen public and private organisations across Europe grapple with some of the biggest security and identity challenges of our time, such as how to securely and rapidly on-board citizens and customers digitally and at scale, so that they can access vital services. Meanwhile, at a governmental level there are calls for an EU-wide framework for secure public electronic identification, that would give citizens control over their online identity and data, as well as enabling access to public, private and cross-border digital services.”

Shamah adds: “ISSE 2020 is bringing together the foremost experts in areas of technology, business, policy and law to focus on how to overcome the on-boarding challenge, potential solutions for a single identity system and the importance of standards.”

About EEMA
Brussels-based, EEMA is the leading independent European think tank focusing on identification, authentication, privacy, risk management, cyber security, the Internet of Things and mobile applications. EEMA’s world class conferences provide the forum to network with digital enterprise experts, high level EC and other government experts. Meanwhile, its series of high-level fireside briefings in Brussels and London provide the ideal forum for industry leaders to tackle controversial hot topics in an intimate, invitation only setting.

Through collaboration with EU & Global Partners (including the creation and coordination of the European Trust Foundation), EEMA has established a growing network throughout Europe. This community provides the ideal platform to disseminate information and share expertise regarding the high-profile and significant EU projects EEMA is involved in.
