

Placing EU citizens in control of their personal information

On 1st January, EEMA commenced work on the GLASS project. Bringing its experience as a consortium partner, participating on other major Horizon 2020 initiatives including FutureTrust, LIGHTest and its current involvement in DE4A and LOCARD, EEMA joins 11 other interdisciplinary partners from eight countries for this three-year project.

GLASS (SinGLE Sign-on eGovernAnce paradigm based on a distributed file

exchange network for Security, transparency, cost effectiveness and trust) aims to deliver a distributed framework for sharing common services of public administration across the EU, for the benefit of citizens, businesses, and governments.

In doing so it will create a strong social, societal, economic, technological, and scientific impact,

leading to an advanced eGovernment solution that is fully aligned with the EU eGovernment Action Plan 2016-2020 and the EU Digital Single Market Strategy.

A citizen-centric project, GLASS will create a streamlined process for EU citizens to quickly and easily share evidence, such as a birth certificate or driving licence, with third-parties in other Member States, in order to access the eGovernment services they require.

Webinar: A New Common Approach to Manage Cross-Border Digital Evidence

This High-Level Fireside Briefing webinar will focus on how to improve the sharing of information between law enforcement and criminal justice departments across EU Member States, in order to preserve chain of custody and evidence admissibility in courts. Confirmed speakers include: Superintendent at Bavarian Police, Tobias Mattes; Lead Researcher at Athena Research Center, Fran Casino; Chief Business Development Officer at MSAB, Michael Dickinson,

and Security Consultant at EEMA, Steve Kemsley, who will moderate the session.

Date: 23rd February 2021

Time: 16.00 to 17.15 (CET)

Registration: <https://locard.eu/component/jem/event/17-a-new-common-approach-to-manage-cross-border-digital-evidence>

DE4A celebrates 1st anniversary

In addition to commencing a new project on 1st January (GLASS), EEMA also celebrates the first anniversary of Digital Europe for All (DE4A). The project supports the Single Digital Gateway Regulation

across Europe ((EU) 2018/1724) and is helping to make the digital single market a reality. Its goal is to facilitate migration towards European Digital Public Services co-delivered across borders, across

sectors and with different participants, reinforcing trust in public institutions, and unleashing multiple measurable positive impacts on efficiency gains and reduction of administrative burden and costs.

The project includes three real-life pilots - Studying Abroad Pilot (paperless procedures for student mobility), Moving Abroad (enabling citizen mobility across the EU) and Doing Business Abroad (doing business in another Member State).

For more information about the project visit:

www.de4a.eu

On 1st February, EEMA will launch its latest member initiative – **EEMA Intelligence**. Members will have free access to regular new independent research, reports and papers, supported by exclusive insights from world-leading subject matter experts including John Erik Setsaas (Signicat), Arthur Leijtns (FLIGHTMAP.com), Herbert Leitold (A-SIT), Jon Shamah (EJ Consultants), Rick Chandler (Advanced Office Systems), Arkadiy Kremer (RANS), Hans Graux (Timelex) and Marc Sel (Trust Warp).

Steve Pannifer joins the Board of Management

EEMA is proud to announce the appointment of Steve Pannifer - Chief Operations Officer at Consult Hyperion - to its Board of Management. A well-respected expert in the field of digital identity, Steve has worked on leading initiatives for card schemes, banks, and governments around the world. Steve has been part of the EEMA community for many years, including collaborating on the Horizon 2020 project - FutureTrust.

“Through my work at Consult Hyperion I am fortunate to be involved in many interesting developments around the world, especially in identity and payments,” comments Pannifer. “My hope is that this will enable me to bring ideas and connections that will help to shape and guide EEMA’s future activities.”
