

EEMA Brief

February 2017 Issue 3

EEMA Events & News

EEMA Fireside High Level Briefing: Just how many passports do you need? Do you need a financial passport too?

16 March: 6:00pm – 8:30pm, London, Hosted by ATOS

For portability of KYC (Know your Customer) the greatest efficiency and privacy would be to have the data owned and managed by the individual. Where does this leave traditional players like credit rating agencies? Is there an ecosystem where credit rating agencies and user centric KYC can - co-exist? Join us for a thought-provoking debate and discussion on this critical subject. The speakers are:

- Dave Birch: Dave is Director of Innovation at Consult Hyperion
- Mark Pearce: Mark is a Strategic Business Development Director at Experian
- Gene Vayngrib: Gene is CEO & Co-founder of Tradle.

There will be a buffet, wine and networking before and after the meeting. Register now to avoid disappointment.

EEMA Fireside High Level Briefing: Prepare your board for a cyberattack: Your risk and reputation?

27 June, ATOS London

Further details of this next High Level Briefing will be available shortly.

EEMA's 30th Annual Conference: Privacy v Identity – Opportunity and Challenges

Hosted by Microsoft and incorporating TDW – Trust in Digital World; supported by DG Connect, European Commission and ENISA

4-5 July, London

Join EEMA, the leading European Think Tank, which brings together leading International experts and actioners, to discuss key influences and issues in the industry at this unique intimate conference offering:

- Unique opportunities that create exceptional networking opportunities
- Relationships that lead to strategic alliances and joint ventures
- Interactions with governments, regulators, corporates and innovators to provide unique insights.

Topics include:

- The impact of future trends and technologies
- How to build KYC across Europe
- Understanding the ROI from big data & analytics
- Mobile identity & trust
- Identity and strong authentication
- Cloud security
- Cross border interoperability
- IOT applications supporting the digital economy

- Regulatory and legal issues
- Blockchain applications and experiences
- Status and experiences in cross-border identities.

For full details and to register please visit www.eema.org.

EEMA contributes to the Web Fraud Prevention Market Guide 2016/2017

The fraud prevention and online authentication space is a highly evolving and dynamic one, with constant new players on the market competing for the upper hand in this dynamic ecosystem. The mandate of this Guide is to provide a comprehensive overview of the main industry topics such as machine-learning, PSD2 – Strong Customer Authentication, open banking, digital identity and API security. Some of the major industry associations that have provided their valuable input include the MRC, Innovate Identity, Payment Counsel, Consult Hyperion, First Annapolis and Gartner. Jon Shamah, EEMA Chairman, has contributed an insightful section of the guide, ‘The new generation of consumer-focused identity providers’, which can be downloaded, together with the full guide, from [blog section of the EEMA website](#).

TrustSeed

Member representative: Eric Blot-Lefevre

www.trustseed.com

TrustSeed was created in 2002 as a publisher of digital exchange security software. Today it is recognised as a pioneer regarding the advent of IDaaS. In an environment that is increasingly open, reliability and simplicity of identity solutions in the cloud is accelerating adoption of new online services for consumers, businesses and administrations. TrustSeed solutions are based on 15 global patents filed between 2006 and 2010 which preceded and influenced upcoming European Regulations such as eIDAS, the NIS Directive on Data Protection and cybersecurity applied to publishers.

Workshop principles and guidance on eID interoperability for online platforms

8 March, Brussels

The Communication *on Online Platforms and the Digital Single Market* said that the Commission would promote interoperability, including issuing principles and guidance on eID interoperability by 2017. The aim is to encourage online platforms to recognise other forms of eID – in particular those notified under the eIDAS Regulation – that offer the same or higher assurance as their own. This workshop in Brussels brings together representatives of online platforms, private and business platform users and other interested parties to discuss the way forward.
