Earlier this month, we were proud to welcome delegates from over 20 countries to EEMA’s 32nd Annual Conference in London. Each year, this important event highlights the plethora of benefits EEMA membership affords – unparalleled access to world-leading experts, the opportunity to get involved in new initiatives and projects, and forge new commercial relationships.

What’s more, every EEMA member has the opportunity to participate in our Speaker and Consortium Panels, benefit from reduced fees for our Annual and ISSE conferences, as well as free entry to our popular High-Level Fireside Briefings. For non-members who attended the conference, EEMA is offering a time limited 25% discount off the first year of membership. Simply email: info@eema.org and one of our membership team will be in contact.

Thank you to everyone who helped to make this conference such a success and we look forward to seeing you all at ISSE 2019, which takes place in Brussels on 6th and 7th November.

Call for Papers – ISSE 2019

This year EEMA’s 21st ISSE Conference will be hosted by IBM in Brussels on 6th and 7th November and will focus on ‘Securing the Next Decade to meet European Business and Society Challenges’.

Speakers will have the opportunity to present their paper to more than 150 international industry leaders in keynote addresses, seminars and fireside debate. Focus topics for 2019 include (but are not restricted to) cybersecurity, artificial intelligence, biometrics, blockchain, Internet of Things, privacy, identity and authentication, policy, regulation and certification.

The closing date for submissions is Friday 26th July and all successful speakers will be given a complimentary pass to the full conference. For more information and to submit a paper visit: www.isse.eu.com

Join the LOCARD Stakeholder Community

LOCARD is a new three-year EU-funded project which aims to provide an holistic platform for chain of custody assurance along the forensic workflow that enables digital evidence metadata to be stored in a blockchain. The project is actively seeking interested organisations and individuals to join its four main stakeholder communities.

1. The cybersecurity community
2. The scientific community
3. The industrial and commercial community
4. Security-related public bodies, CERTs, NGO and law enforcement agencies

For more information and to register please email: info@locard.eu
Participate in FutureTrust EU e-invoicing Pilot

As part of the piloting of FutureTrust, BRZ, the Austrian Federal Computing Centre, is conducting a trial of the FutureTrust technology for e-invoicing. The pilot involves sending a trial signed e-invoice to BRZ and them acknowledging receipt. We are looking for several organisations to assist in this pilot.

You do not need to be using digital signatures yourselves at the moment, and as the pilot is java-based, it takes little time to implement. It should take less than 30 minutes to set up and run on an average Windows laptop. The trial invoices will be supplied together with a required code in a zip file, and there will be someone at BRZ to support you through the installation if needed.

Your assistance in this would really make a difference, and to show our gratitude, for the first 100 invoices in total sent to BRZ from EEMA Annual Conference attendees (before the end of July), EEMA will donate €100 to the International Red Cross. To participate contact Chair of EEMA, Jon Shamah: jon.shamah@eema.org

Share your news with EEMA members. If you have news, initiatives and opportunities that you would like to share with other EEMA members please email Graham Thatcher: graham.thatcher@eema.org
